Property Owner

**SUBJECT: Plymouth Creek Stream Restoration Project – Dunkirk Lane to Plymouth Ice Center
City Project WR250001
Open House - March 11, 2024**

Dear Property Owner:

The City of Plymouth and Bassett Creek Watershed Management Commission are proposing to implement a drainage improvement within your neighborhood, as shown on the enclosed map. The proposed project is generally located within Plymouth Creek (yellow line on map) and adjacent wetlands between Dunkirk Lane North and the Plymouth Ice Center. The project design is not finalized, however improvements with the project are intended to improve the stream's flow, remove blockages, repair streambank erosion, repair storm sewer infrastructure and reduce flooding. All enhancements should assist with improving water quality in Plymouth Creek and Medicine Lake.

City and watershed staff (Barr Engineering) have completed multiple on-site visits in the fall of 2023 and have developed concept plans that we are excited to share with you. **Staff will be hosting a public open house on Monday March 11th, 2024, from 5:00pm – 7:00pm in the Council Chambers at City Hall, 3400 Plymouth Blvd.** At the open house, city and watershed staff will be available to discuss project concepts and answer questions that residents in the project area may have.

We look forward to seeing you on March 11th.

Sincerely,

A handwritten signature in blue ink that reads 'Ben Scharenbroich'.
