SUBJECT: CONSTRUCTION UPDATE – PROJECT SCHEDULE
19TH AVENUE AND DUNKIRK LANE POND IMPROVEMENT
CITY PROJECT NO. WR190001

Dear Property Owner,

The City of Plymouth wanted to share an update about the 19th Avenue and Dunkirk Lane Pond Improvements, City Project #WR190001. This project involves stormwater structure repairs and the removal of sediment in the pond west of the 19th Avenue and Dunkirk Lane intersection.

The City planned to complete the project this winter. Unfortunately, due to extremely warm winter temperatures this year, conditions have not allowed the contractor to safely access the areas needed to do this work.

The City is hereby notifying all adjacent property owners that the City has decided to delay construction until next winter to allow time for more favorable construction conditions. Construction is now planned to be completed next winter in 2024-2025. I am sorry for any inconvenience this has caused, and I appreciate your understanding about the revised project schedule.

The city of Plymouth will mail another construction notice before construction begins. Project information and construction plans can also be found on the city website at:

www.plymouthmn.gov/departments/public-works/project-spotlight/water-resources-projects.

For more information, please contact Amy Riegel at 763-509-5531 or ariegel@plymouthmn.gov.

Sincerely,

Amy Riegel
Senior Engineering Technician
